fatwir@uw.edu

Interests: Machine Learning, Deep Learning, Computer Vision, Signal Processing, Image Processing

+1-(206)-687-2438

Education

University of Washington

Seattle, USA

Master of Science in Electrical Engineering

Sept 2022 - June 2024

GPA: 3.89/4.00, Specialization: Machine Learning, Deep Learning and Computer Vision, Advised by Dr. Linda Shapiro

National Institute of Technology Karnataka

Surathkal, India

Bachelor of Technology in Electrical and Electronics with Minor in Computer Science

July 2018 - May 2022

CGPA: 9.71/10, Ranked 2nd out of 109 students in the department, Thesis: A Game of Snakes and GANs [2]

· Awarded the DAAD-WISE Fellowship by the German Consulate and the IAS Fellowship by the Indian Academy of Sciences

Professional Experience

Alpenglow Biosciences

Seattle, USA

Deep Learning Research Intern (Computer Vision and GenAI)

June 2023 - Present

- Worked on the neural style transfer problem for stains using supervised and adversarial approaches, saving the firm approximately 700 hours in manual annotations. This resulted in a cost reduction of staining from \$5 million to only \$1000
- Experimented with normalization and chunking for large 3D datasets (\sim 250 GB), leading to a 10% improvement in loss
- Employed supervised learning with UNets, incorporating losses such as KLD, weighted MSE, and trained on 7500 images
- Implemented Pix2Pix and CycleGAN, outperforming the supervised method by almost 15% on a validation set of 750 images
- · Investigating various guided diffusion-based models, including pre-trained and custom-built, for zero-shot stain transfer
- Optimized data processing pipeline, refining algorithm accuracy, and implementing parallelization for large datasets. This included a content-based autocropping feature that led to 40% reduction in processing time and saved 30-50% in storage
- · Contributed to development of the GUI for microscope software and enhanced the saving module for the calibration settings

RadiusAl Seattle, USA

Computer Vision Researcher (Capstone - Computer Vision and GenAl)

Jan 2023 - June 2023

- Worked on self-checkout problem using synthetic Image Generation (2D/3D) to improve training of object detection models
- \cdot Accelerated training by almost 20% using **Fully-Fused MLPs** to train a custom object dataset of around 140 images
- · Achieved 25.96 dB PSNR in training a Neural Radiance Field (NeRF), deviating by 0.6 dB from original implementation
- · Notably, training time was substantially reduced by 42% by efficiently utilizing 93% of the GPU

Publication(s)

- W. O. Ikezogwo, M. S. Seyfioglu, F. Ghezloo, D. S. C. Geva, F. S. Mohammed, P. K. Anand, R. Krishna, L. Shapiro, "Quilt-1M: One Million Image-Text Pairs for Histopathology", Proc. NeurIPS 2023 Datasets and Benchmarks Track (*Oral - Acceptance* $\sim 0.5\%$)
- 2. S. Asokan, F. S. Mohammed, and C. S. Seelamantula, "A game of snakes and GANs," Adversarial Learning Track, Proc. IEEE International Conference on Acoustics, Speech, and Signal Processing (ICASSP), 2023 (Oral Presentation - Acceptance $\sim 13\%$)

Research Experience

GRAIL: UW Graphics and Imaging Laboratory

Seattle, USA

Graduate Research Assistant (Computer Vision and NLP)

Dec 2022 - June 2023

- Developed the largest public vision-language histopathology dataset, comprising approximately 1,000,000 image-text pairs
- · Fine-tuned a pre-trained CLIP model (QuiltNet) for this dataset and achieved superior results compared to State-of-the-Art models
- · Made improvement in zero-shot learning and linear probing using our LMM, QuiltNet in classifying images and cross-modal retrieval
- This LLM and ASR-based multimodal data generation approach was bestowed with an oral publication at NeurIPS 2023

Indian Institute of Science, Bangalore

Bangalore, India Dec 2021 - July 2022

Bachelor Thesis (GenAl and Optimization)

- Worked on optimizing the performance of GANs as a precusor to which Wasserstein Generative Adversarial Networks (WGAN) were implemented for 1D and 2D Gaussian Target Distributions whilst analyzing snakes using gradient vector flow (GVF) fields
- · Solved the optimal discriminator PDE by bridging the gap between GVFs and GANs finite differences and grid inversion in 2D
- · Accelerated convergence within 100 iterations (vs. SOTA) on 2D Gaussian targets with active contours using WGANs
- · Improved computational efficiency for the SnakeGAN to learn the latent space distribution of SVHN and CelebA datasets
- This snake based GAN optimization was bestowed with an oral publication at the Adversarial Learning Track of ICASSP 2023

Peter L. Reichertz Institute for Medical Informatics - TU Braunschweig

Braunschweig, Germany

Research Intern - DAAD-WISE Scholar (Deep Learning for Medical data)

July 2021 - Nov 2021

- Performed Blood Pressure estimation from photoplethysmogram signals taken from the MIMIC-III waveform dataset
- · Devised a **spectro-temporal** Deep Neural Network and attained near perfect correlation ($R \approx 0.95$) between BP with PPG
- Improved R value by 0.15 by exploiting frequency information of PPG and its derivatives using GRUs and spectrograms
- \cdot Enhanced the performance of the DeepNet by 10% leveraging **Python, MATLAB and Bash** scripts for extensive data preprocessing using classical signal processing techniques (Elgendi Algorithm, Hampel and Frequency Filters)
- Trained the network on 251 patient records (approximately 2 hours of time-data) using leave-one subject out cross-validation

Centre for Computational Imaging - IIT Palakkad

Palakkad, India

Summer Research Intern - IAS-SRFP Scholar (Image Processing)

May 2021 - Nov 2021

· Analysed Subtle Motion on ultrasound images of the Common Carotid Artery to perform video magnification to estimate BP

Estimated phase by oscillation enhancement and computing single orthant analytic signal, followed by motion magnification

Relevant Courses and Skills

Relevant Courses: Advanced Introduction to ML, Computer Vision, Control Theory, Data Structures and Algorithms, Digital Imaging Systems, Digital Signal Processing, Fourier and Wavelet Analysis, Graph Theory, Machine Learning, Neural Networks, Linear Algebra, Probability and Random Processes, Optimization Techniques, Soft Computing, Signals and Systems

Skills: Python, PyTorch, OpenCV, NumPy, SciPy, Scikit-Learn, AIVIA, Napari, Jira, Git, AWS, Dask, COLMAP, SpaCy, Seaborn, TensorFlow, Keras, Pandas, MATLAB, Quaternion FT, Advanced Image Processing, Ultrasound Imaging, Deep Learning, Machine Learning
